PROJECTS

ScareBnb

[Live Site](#) | [Github](#)

A single page app that uses a Rails backend with a React, Redux, and JavaScript frontend to allow users to search for short-term home rentals

- Employs Google Maps API for geolocation, search filtering based on user-set bounds, predictive search text, and clickable markers
- Animates images and text via CSS keyframes
- Uses chained Rails ActiveRecord queries to filter searches based on user parameters in minimal database hits

Seasonal

[Live Site](#) | [Github](#)

A conceptual game animating the changing of the seasons solely with JavaScript and HTML5

- Animates backgrounds along with a user-controlled stick figure on a single canvas
- Retrieves image data from the canvas and uses individual pixel data to invert and show opaque figures.
- Fully animated motions of walking and jumping, using spritesheets

kingDOM

[Live Site](#) | [Github](#)

JavaScript library that allows interaction with and manipulation of the DOM.

Allows users to:

- search for HTML elements via CSS selectors
- manipulate and toggle classes of elements
- manipulate HTML content
- make Asynchronous Javascript + XML requests and display the results
